Denis Ostroushko

Dear Hiring Team at Peer Knight, I am writing to express my enthusiasm for the Statistical Consultant position at Peer Knight. With a Master's degree in Biostatistics and over five years of experience in data analysis and statistical modeling,

I am excited about the opportunity to bring my skills and expertise to your team. Throughout my career, I have demonstrated a strong commitment to leveraging statistical methodologies to drive informed decision-making. As a Graduate Research Assistant at the University of Minnesota, Division of Biostatistics, I led studies on Alzheimer's Disease progression and variable selection, translating complex findings into actionable insights that enriched medical knowledge.

During my tenure at Medica as a Healthcare Analyst, I collaborated closely with business partners to assess member assistance programs and enhance risk models for hospital readmission, resulting in significant cost savings and performance improvements. These experiences honed my ability to collaborate with stakeholders, communicate complex analyses effectively, and deliver impactful results. What sets me apart is my attention to detail, project ownership, and ability to prioritize tasks to meet deadlines.

 I am proficient in statistical tools such as SAS, R, and Python, with a strong foundation in data management and analysis. I am particularly excited about the opportunity at Peer Knight to apply my skills in reviewing and validating insurance company statistical data feeds, providing project-based oversight, and leading client accounts to ensure timely and high-quality deliverables.

I look forward to the opportunity to discuss how my background aligns with the needs of Peer Knight and how I can contribute to your team. Thank you for considering my application.

Warm regards,
Denis Ostroushko
